

AltoSa[®]-XL Gemini Balloon Catheter

unique working length in double balloon design

AltoSa®-XL Gemini Balloon Catheter

- Optimal deployment balloon catheter for open/closed and/or hybrid cell designed stents.
- Zero-shoulder technology design to optimize selective vessel wall dilatation.
- Designed for double balloon dilatation to ensure uniform stent expansion due to equal working length of balloons.
- Advanced Nylon balloon material offering high-pressure, non-compliant and puncture resistant balloon performance.
- Fast inflation/deflation time.

Please note: the Inner Balloon diameter (IB Ø) is smaller than the Outer Balloon diameter (OB Ø).
Please refer to Order Codes table. The working length of Inner and Outer balloon are equal in length.
