

Optimus[®] CVS PTFE Covered Stent

unique PTFE sandwich bonded stent design

Optimus® CVS PTFE Covered Balloon Expandable Stent

- Designed for extra safety in every day and challenging procedures.
- The Hybrid Cell design with Omega-Flex® Connector. Providing enhanced expansion range, flexibility, uniform cell expansion and high radial force.
- High conformability in vessel tortuosity.
- Unique sandwich bonded PTFE Covered stent with end-free segments.
- Intended to use in complex interventional procedures where enhanced safety of a PTFE covering is required.

Technical Information

Material	Cobalt Chromium MP35N / PTFE
Stent Design	Hybrid Cell Design with Omega-Flex® Connector
Dilatation Range Optimus-CVS L-Stent	9 ZIGS To Range From 12mm - 18mm Ø
Recommended Delivery Sheath Size for L Stent	Minimal +3F higher than rec. Introducer Size of selected PTA balloon
Dilatation Range Optimus-CVS XL-Stent	12 ZIGS To Range From 18mm - 24mm Ø
Recommended Delivery Sheath Size for XL Stent	Minimal +3F higher than rec. Introducer Size of selected PTA balloon
Dilatation Range Optimus-CVS XXL Stent	15 ZIGS To Range From 22mm - 28mm Ø
Recommended Delivery Sheath Size for XXL Stent	Minimal +3F higher than rec. Introducer Size of selected PTA balloon
Stent Recoil	< 10%
Stent Covering	Unique PTFE sandwich bonded technology

Stent end-length (mm)* / Deployed diameter (mm)
