Occlutech Delivery Set III
Leading the way

Occlutech Delivery Set III (ODS III)

Leading the way

The ODS III is a delivery set - consisting of a sheath, dilator and loader - intended for the introduction of diagnostic and therapeutic devices into the human vasculature.

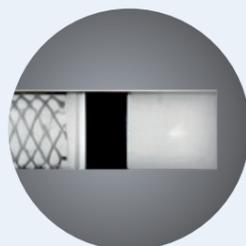

Discover the Advantages of ODSIII

Integrated Hemostatic Valves
Minimizing air embolism and blood loss

Reinforced Braiding Technology
Providing control and kink resistance, while maintaining optimal flexibility

Radiopaque Marker
Enhancing visibility of the distal tip under fluoroscopy for easy positioning

Developed in collaboration with leading cardiologists

Sheath

Sideport holes
Sideport holes on distal tip for aspirating and flushing

Tapered sheath tip
Smooth tapered sheath tip dilator transition during peripheral and transseptal access

Color coding
Designed to facilitate size identification

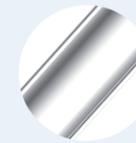

Versatile portfolio
Versatile range designed to treat different anatomies across several procedures

Loader

Transparent material
Allows visualization of air bubbles

Low friction inner lumen
Facilitates the loading of the device

Dilator

Radiopaque material
Constructed of low friction and radiopaque material

0.038"
Compatibility
Guidewire compatibility up to 0.038"
